

Model Answer

**A: The Definition for:**

- Software: any set of instructions that tells the hardware what to do. It is what guides the hardware and tells it how to accomplish each task
- Hardware: is any part of your computer that has a physical structure, such as the keyboard or mouse. It also includes all of the computer's internal parts
- Application: a type of software that allows you to perform specific tasks. Applications for desktop or laptop computers are sometimes called desktop applications, and those for mobile devices are called mobile apps. When you open an application, it runs inside the operating system until you close it.
- Web browsers: the tool you use to access the Internet.
- Mac: The Macintosh computer was introduced in 1984, and it was the first widely sold personal computer with a graphical user interface,
